

RESEARCHER IN GLACIOLOGY

The **Center for Advanced Studies in Arid Zones (CEAZA)**, located in La Serena and Coquimbo - Chile is a scientific consortium, established in 2003 (www.ceaza.cl), which is dedicated to studying the impact of climatic and oceanographic variability on the hydrological cycle and biological productivity in the arid zones of Northern-Central Chile.

CEAZA is searching for a full-time **RESEARCHER** in **GLACIOLOGY**

Description of role:

The successful candidate will undertake research on the cryospheric (glacier, snow and/rock glacier) processes involved in the water cycle of semiarid Northern-Central Chile, which may include, but is not limited to: cryosphere-climate interactions; cryosphere contribution to local catchments; cryosphere triggered hazards.

She/He will work in close collaboration with CEAZA researchers, including in Hydrology, Climatology, Meteorology, Paleoclimatology and Land use planning, but may also develop innovative research projects with other disciplines (such as biologists and oceanographers). The successful candidate will participate in ongoing research projects, but will also be expected to develop and lead new projects and secure their funding. She/He will communicate her/his research to the wider community, especially local decision-makers, through their participation in workshops, seminars and other outreach activities. The researcher will be able to collaborate in or coordinate courses (or thesis guidance) at post-graduate level. Finally, it is expected to be involved with CEAZA Scientific Council and group coordination activities in the mid-term.

Minimal qualifications and experience:

- Ph.D. in a glaciology related field, such as geography, geology, engineering, mathematics among others
- Experience in research, demonstrated by a track record of publications in relevant journals (at least 6 ISI/WoS publications over the past 3 years).
- Experience in research, demonstrated by participation and/or leadership in research projects (equivalent to Chilean ANID programs).
- Ability to use and develop glaciological models (physical and/or statistical).
- Experience in field glaciology.
- The capacity to manage groups and work with researchers from other disciplines.
- Ability to work in a team.
- *Desirable*: Have at least a basic level of Spanish (communicative skills) at the time of assuming the position.
- *Desirable*: Have research experience in arid zones.
- *Desirable*: Have experience using a range of field equipment such as LiDAR, GPR and GNSS instruments.
- *Desirable*: Experience in remote sensing data processing.
- *Desirable*: Understanding of water resource issues within the context of climate variability and land use/land cover change.
- *Desirable*: Experience in communicating research outputs to stakeholders (eg: water resource managers, local government bodies, general public).

Practical details:

- The position is available from July 1st, 2022 (or afterwards upon agreement).
- The position is permanent, subject to positive annual academic evaluation.
- The position is based at CEAZA's La Serena facilities.
- The application can be submitted in English or Spanish, and should contain:
 - A research statement describing experience, motivation for this position and research proposal to undertake in CEAZA.
 - A Curriculum Vitae.
 - Certificates and other relevant documents that confirm University qualifications and/or other relevant information.
 - Two references letters referring to the trajectory of the candidate. These must be sent directly to **ofertas.laborales@ceaza.cl**

The successful applicant will work as part of Geosciences group at CEAZA. More information about CEAZA and ongoing projects can be found at <http://www.ceaza.cl>. Do not hesitate to contact Dr. Jaime Cuevas (jxcuevas@ceaza.cl) for any additional details.

Applications should be sent to Dr. Carlos Olavarria, CEAZA Executive Director (**ofertas.laborales@ceaza.cl**) before **June 3rd, 2022**.

Selection process

- CEAZA reserves the right to select the applicants that it deems most suitable or not select any of the candidates.
- Applicants who join this selection process agree to undertake all evaluation instruments that are deemed appropriate to verify their competencies and experience, including interviews and psychological tests.
- CEAZA will notify in writing the result of their application to all candidates, including the successful candidate, who must confirm in writing their acceptance of the offer of the position.
- CEAZA will follow the Chilean national policy of equal opportunities regardless of gender in science and technology. We support also Chilean policy on advanced qualifications of human resources, encouraging, thus, early careers researchers applying for this position.
